

# Signal Reporter Assay Kit

## ISRE Reporter Assay Kit (GFP)

Cat. no. 336841 CCS-008G

### For study of pathway activity

The Cignal ISRE Reporter Assay Kit is designed to monitor the activity of type 1 interferon-induced signal transduction pathways in cultured cells. The kit contains a transfection-ready ISRE reporter construct as well as positive and negative controls. Type I interferons (IFN- $\alpha$  and - $\beta$ ) mediate signaling through STAT1 and STAT2 components of the JAK/STAT-signal transduction pathways. The ISRE reporter encodes the Monster GFP gene under the control of a minimal (m) CMV promoter and tandem repeats of the interferon stimulated response element (ISRE). The reporter has been experimentally optimized to maximize the signal to noise ratio by testing the number of response elements as well as intervening sequence between the response elements.

For further details, consult the *Cignal Reporter Assay Handbook*.

### Shipping and storage

The Cignal Reporter Assay Kit is shipped on dry ice or blue ice. Store at  $-20^{\circ}\text{C}$ . When stored under these conditions, this product can be used for 6 months from the date of receipt without reduction in performance.

**Note:** Open the package and store the products appropriately immediately on receipt.

## Contents

Product	Contents	Cat. no.
Signal Reporter Assay Kit	For 500 reporter assays, 500 negative control assays, and 250 positive control assays when using the recommended 96-well plate transfection protocol; 500 $\mu$ l (100 ng/ $\mu$ l) Reporter (40:1 mixture of inducible firefly luciferase construct and constitutively expressing Renilla luciferase construct); 500 $\mu$ l (100 ng/ $\mu$ l) Negative control (40:1 mixture of non-inducible firefly luciferase construct and constitutively expressing Renilla luciferase construct); 250 $\mu$ l (100 ng/ $\mu$ l) Positive control (40:1:1 mixture of constitutively expressing GFP, constitutively expressing firefly luciferase, and constitutively expressing Renilla luciferase constructs)	Varies

Signal Reporter Assay Kit products are intended for molecular biology applications. These products are not intended for the diagnosis, prevention, or treatment of a disease.
