

# Validation Data Sheet

Microbial DNA dPCR Assay	<i>wbkA</i>
Assay Catalog No.	DMA00688-F
Description	Virulence gene detection assay targeting the bacterial glycosyltransferase family 4 protein gene
dPCR Master Mix	QIAcuity Probe PCR Master Mix
Experimental Sample(s)	Microbial DNA Positive Control (PMC)

**Microbial DNA Detection Analysis:** Concentration values [copies/ $\mu$ l] for different experimental sample input amounts (2  $\mu$ l, 0.2  $\mu$ l, 0.02  $\mu$ l and 0  $\mu$ l). Bars represent mean values of technical triplicates. Error bars depict the standard deviation.

**1D Scatter Plot:** Single-well data with autothresholding (representative well of technical triplicates) for the different experimental sample input amounts in the 4 wells (2  $\mu$ l, 0.2  $\mu$ l, 0.02  $\mu$ l and 0  $\mu$ l). Green channel for FAM detection.
