

RT² Profiler PCR Array (Rotor-Gene® Format)

Rat MAP Kinase Signaling Pathway

Cat. no. 330231 PARN-061ZR

For pathway expression analysis

Format	For use with the following real-time cyclers
RT ² Profiler PCR Array, Format R	Rotor-Gene Q, other Rotor-Gene cyclers

Description

The Rat MAP Kinase Signaling Pathway RT² Profiler PCR Array profiles the expression of 84 genes related to the MAP kinase (MAPK) signaling pathway. Members of the MKKK, MKK, and MAPK families are represented on this array. Transcription factors and genes whose expression is induced by MAP kinase signaling are included as well. Raf regulating proteins and MEKK1 interacting proteins are found on this array along with cell cycle proteins regulated by the Erk1/2 pathway. Genes related to scaffolding and anchoring are also included. Using real-time PCR, you can easily and reliably analyze expression of a focused panel of genes related to the MAPK signaling pathway with this array.

For further details, consult the *RT² Profiler PCR Array Handbook*.

Shipping and storage

RT² Profiler PCR Arrays in the Rotor-Gene format are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products.

For long term storage, keep plates at –20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Array layout

The 96 real-time assays in the Rotor-Gene format are located in wells 1–96 of the Rotor-Disc™ (plate A1–A12=Rotor-Disc 1–12, plate B1–B12=Rotor-Disc 13–24, etc.). To maintain data analysis compatibility, wells 97–100 do not contain real-time assays but will contain master mix to account for weight balance.

Gene table: RT² Profiler PCR Array
