Description

The Rat Polycomb & Trithorax Complexes RT² Profiler PCR Array profiles the expression of 84 key polycomb and trithorax complex components including chromatin modification enzymes and remodeling factors. The polycomb and trithorax complexes maintain epigenetic control of cell type specific gene expression patterns important for cellular identity via histone modification. The polycomb complex causes transcriptional repression, while the trithorax complex reverses that effect to maintain an active state of transcription. Polycomb and trithorax complex activity controls the proper differentiation of induced and embryonic pluripotent stem cells. Dysregulation of their activities promotes oncogenesis by causing inappropriate expression of cell identity, differentiation and proliferation genes. Research into the expression and regulation of these complexes can help determine the underlying mechanisms of histone modification based regulation of gene expression during differentiation and oncogenesis. This array includes core components of the polycomb and trithorax complexes as well as key interactors and genes necessary for complex assembly. Using real-time PCR, your research study can easily and reliably analyze the expression of a focused panel of genes involved in polycomb and trithorax complex activity with this array.

For further details, consult the *RT² Profiler PCR Array Handbook*.

Shipping and storage

RT² Profiler PCR Arrays in formats A, C, D, E, F, and G are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products. RT² Profiler PCR Arrays in format H are shipped on dry ice or blue ice packs.

For long term storage, keep plates at –20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Array layout (96-well)

For 384-well 4 x 96 PCR arrays, genes are present in a staggered format. Refer to the *RT² Profiler PCR Array Handbook* for layout.
