

## QIAseq Targeted RNA Panels

### Human Extracellular Matrix & Cell Adhesion Molecules

Cat. no. 333002 RHS-004Z-12

**For gene expression profiling by RNA sequencing with laboratory-verified primer sets**

The Human Extracellular Matrix & Cell Adhesion Molecules QIAseq targeted RNA panel profiles the expression of 421 genes important for cell-cell and cell-matrix interactions. Cells attach to proteoglycans and glycoproteins (such as fibronectin, laminin, and collagen) in the extracellular matrix (ECM) substratum via adhesion molecules on their cell surface to define tissue shape, structure, and function. The making and breaking of cell-cell and cell-ECM contacts are critical steps in normal processes such as cell growth, division, differentiation, and migration. Disease states (metastasis, rheumatoid arthritis, and cardiovascular and central nervous system disorders) and pathophysiological processes (wound healing and inflammation) also involve ECM remodeling and changes in the classes of cell adhesion molecules expressed on cell surfaces. This panel contains ECM proteins including basement membrane constituents, collagens, and other genes defining ECM structure. Matrix and other metalloproteinases that remodel the ECM as well as their inhibitors are also represented. This panel also includes integrins, selectins, cell-adhesion molecule family members (ICAM, ECAM, NCAM, PECAM, and VCAM), and other genes important to cell adhesion and cytoskeleton bridging such as the catenins. Using digital RNA sequencing, the expression of a focused panel of genes related to cell adhesion and the ECM may be analyzed with this primer pool.

For further details, consult the *QIAseq Targeted RNA Panel Handbook*.

Panel is enough for 12 samples.

#### Shipping and storage

QIAseq Targeted RNA Panels are shipped in two boxes: box 1 of 2 is shipped on dry ice and box 2 of 2 is shipped on blue ice. For long-term storage, keep the contents of box 1 at  $-20^{\circ}\text{C}$  and the contents of box 2 at  $4^{\circ}\text{C}$ . If stored under these conditions, the panels are stable for 8 months after receipt.

**Note:** Open the package and store the products appropriately immediately upon receipt.
